DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 have been allowed.
2. The following is an examiner's statement of reasons for allowance:

As to claims 1-17, patentability resides, at least in part, in the combination of: a system for dividing a single flow into at least two secondary flows of desired ratios, including an inlet with the single flow, at least two lines connected to the inlet, an input device receiving at least one desired ratio of flow, a in-situ process monitor providing measurements of product produced by the each of the flows, a controller connected to the input device and the in-situ monitor, wherein the controller receives the desired ratio of flows and the product measurements from the in-situ monitor and calculated a corrected ratio of flow based upon the desired ratio of flow and the product measurements, in further combination with the other limitations of base claim 1.

As to claims 18-31, the patentability resides in a method for dividing a single flow into at least two flows of desired ratio of a system of claims 1-17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lofton et al., Grutter, Moslehi, Sui et al., and Barnes et al. disclose related art.
